Work Experience

Tops Technologies

WEB DEVELOPMENT

mar 22-jun 22

- Working on different website to develop business and other travelling websites.
- Created and worked on projects which is based on management. And created UI and UX experience in better way.
- Developed skills on HTML, CSS and Javascript with help of react library.
- Managed data with proper format and learn about server and APIs.

Projects

Donation Management System

- Donation Management System is a web application which is created for purpose online charity.
- We created this project for the people who donate freely and on a trustworthy platform. So our this project will help them to make this possible.
- We used technologies like for frontend HTML, CSS and Javascript with help of react library. And for database we used MongoDB and for server side scripting we used Node.js.
- We try to connect with NGOs to get amount on side.
